

Witness daring strategies, raw courage, and fierce resolve in the Civil War!

THE BLUE AND THE GRAY will introduce you to an America of high principles and high passions. Noble ideas were hotly debated by public men and private citizens, poor immigrants, wealthy ladies...and recorded in letters from young volunteers to the folks back home.

You'll hear their words—eloquent and earthy—as you examine the roots of the war...witness the terrible countryside battles...see the first clash of ironclad ships. Admire the brilliance of Lee...the tenacity of Grant...and deplore the opportunities squandered by Generals McClellan and Bragg.

A wealth of photographs and sensitive narrative paint a true portrait of individuals in the 1860s. You'll be moved by the ideals they lived by—and died for. And you'll feel the pain of countrymen locked in battle in that fateful test of our nation's character.
